OVA DEPOSITION PREFERENCE SURVEY FORM

SITE NAME:		**GRID REF:**		**SPECIES:**	DINGY SKIPPER
DATE:		**RECORDER:**			

OVA DEPOSITION DETAILS

1. Vegetation Height (measured in cm)										
2. Number of eggs on foodplant										
3. Colour of egg (yellow/Orange)										
4. Height of shoot containing egg										
5. Distance of egg from shoot tip										
6. Distance of shoot from centre of main plant										
7. Percentage bare ground within disc area										
8. Percentage of dead dry vegetation within disc area										
9. Percentage of green grass within disc area										
10. Evidence of stock grazing (trampling, cattle paths, dung, poaching) within disc area										
11. Known nectar plants in flower within disc area^2										
12. Seeds heads from the previous year or black plantain heads^3(roosting perches) within disc area										
13. Visible clumps of Rabbit dropping within disc area										
14. Bramble and/or other low invading scrub (e.g. Hawthorn seedlings) within disc area										
15. Aspect, flat ground or on slope orientation to sun (e.g. F=flat, 1SW=shallow slope south west, 2NE=medium slope north east, 3E=steep slope east etc.)										

	5 Metre Square Reference Code										
1.	Vegetation Height (measured in cm)										
2.	Number of eggs on foodplant										
3.	Colour of egg (yellow/Orange)										
4.	Height of shoot containing egg										
5.	Distance of egg from shoot tip										
6.	Distance of shoot from centre of main plant										
7.	Percentage bare ground within disc area										
8.	Percentage of dead dry vegetation within disc area										
9.	Percentage of green grass within disc area										
10.	Evidence of stock grazing (trampling, cattle paths, dung, poaching) within disc area										
11.	Known nectar plants in flower within disc area[2]										
12.	Seeds heads from the previous year or black plantain heads[3](roosting perches) within disc area										
13.	Visible clumps of Rabbit dropping within disc area										
14.	Bramble and/or other low invading scrub (e.g. Hawthorn seedlings) within disc area										
15.	Aspect, flat ground or on slope orientation to sun (e.g. F=flat, 1SW=shallow slope south west, 2NE=medium slope north east, 3E=steep slope east etc.)
